

DSA Phase 6 - Heap, Greedy, and Bit Manipulation (30 Problems)

Heap

1. Kth Largest Element in an Array
2. K Closest Points to Origin
3. Top K Frequent Elements
4. Merge K Sorted Lists
5. Reorganize String
6. Find Median from Data Stream
7. Sliding Window Maximum
8. Minimum Cost to Connect Ropes
9. Smallest Range Covering Elements from K Lists
10. Maximum Sum Combinations

Greedy

1. Activity Selection Problem
2. Fractional Knapsack
3. Job Sequencing Problem
4. Minimum Number of Platforms
5. Huffman Coding
6. Gas Station Problem
7. Jump Game
8. Candy Distribution
9. Queue Reconstruction by Height
10. Assign Cookies

Bit Manipulation

1. Single Number
2. Find the Duplicate Number
3. Sum of Two Integers without + or -
4. Counting Bits
5. Power of Two

6. Reverse Bits
7. Number of 1 Bits
8. Subset XOR Sum
9. Bitwise AND of Numbers Range
10. Maximum XOR of Two Numbers in an Array
