

PHASE 1: Basics (50 Questions)

1. Right-angled triangle star
2. Inverted triangle
3. Pyramid
4. Number pyramid
5. Pascal's triangle
6. Diamond pattern
7. Hollow square
8. Hollow pyramid
9. Butterfly pattern
10. Zigzag pattern
11. Prime check
12. GCD, LCM
13. Sieve of Eratosthenes
14. Count digits
15. Reverse a number
16. Palindrome number
17. Armstrong number
18. Sum of digits
19. Power (a^b)
20. Square root using binary search
21. Linear search
22. Binary search
23. Left rotate by 1
24. Left rotate by D
25. Move zeros to end
26. Remove duplicates (sorted array)

27. Check if sorted
28. Second largest element
29. Leaders in array
30. Reverse an array
31. Count frequency
32. Maximum subarray (Kadane's)
33. Minimize the Heights
34. Merge 2 sorted arrays
35. Union of 2 arrays
36. Intersection of 2 arrays
37. Longest Consecutive Sequence
38. Majority Element (Moore's voting)
39. Subarray with given sum (positive)
40. Stock Buy and Sell
41. Rearrange array with $O(1)$ extra space
42. Count inversions
43. Cyclically rotate array
44. Peak element
45. Array rotation (reversal algo)
46. Trapping rain water
47. Maximum product subarray
48. Longest increasing subarray
49. Equilibrium index
50. Sort 0s, 1s, 2s (Dutch Flag)
