

PHASE 2: Two Pointers, Sliding Window, Hashing (40 Questions)

51. Pair with given sum in sorted array (2 pointers)
52. Remove duplicates from sorted array (2 pointers)
53. Merge intervals
54. Container with most water
55. 3Sum
56. 4Sum
57. Remove element (in-place)
58. Trapping rain water (2 pointers)
59. Check palindrome string (2 pointers)
60. Longest palindrome substring (expand from center)
61. Maximum sum subarray of size k
62. First negative number in every window of size k
63. Count occurrences of anagrams
64. Longest substring with k unique characters
65. Longest repeating character replacement
66. Minimum window substring
67. Longest substring without repeating characters
68. Maximum of all subarrays of size k
69. Count number of subarrays with at most K distinct elements
70. Binary subarray with sum K
71. Two sum
72. Subarray sum equals K
73. Longest subarray with 0 sum
74. Longest subarray with equal number of 0s and 1s
75. Count subarrays with sum K
76. Find all duplicates in an array

77. Top K frequent elements
78. Group anagrams
79. Isomorphic strings
80. Longest consecutive sequence
81. Count distinct elements in every window
82. Find missing number
83. Check for anagram
84. Largest subarray with equal 0s and 1s
85. Subarrays with equal 1s and 0s
86. Longest substring with same letters after replacement
87. Check if two strings are isomorphic
88. Smallest window containing all characters of another string
89. Count pairs with given sum in array
90. Longest substring with at most K distinct characters
